ABOUT US

We launched Robotrading Exchange Traded Fund business in 2001 when the market was in its infancy. Our unquenchable desire to break new ground has enabled us to discover new investment opportunities for our clients. Our pioneering spirit has propelled us to become one of Europe's top three ETF providers (by assets under management). Our insatiable curiosity and indomitable spirit inspires innovation. Our team's experience, passion, and expertise help us to deliver better results for our investors.

WHAT IS CRYPTO?

A cryptocurrency is a form of digital asset based on a network that is distributed across a large number of computers. This decentralized structure allows them to exist outside the control of governments and central authorities.

The advantages of cryptocurrencies include cheaper and faster money transfers and decentralized systems that do not collapse at a single point of failure.

A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

MANAGING FUNDS

These extensive return and risk statistics will help you monitor both the Amundi Alternatives UCITS funds and Managed Accounts, and keep track of your own invested funds and dedicated accounts. You will be able to design your own custom fund portfolios and run your own simulations.
